CHAPTER

ONE

INSTALLATION GUIDE FOR TESTING PURPOSE

In this section, you will be guided on how to download the prototype, create virtual environment, install dependencies and run the website. If you have any problem, please feel free to contact me via email hien.nguyen@edu.turkuamk.fi or WhatsApp +358 46 8404770

1.1 System requirements

1. Python version 3

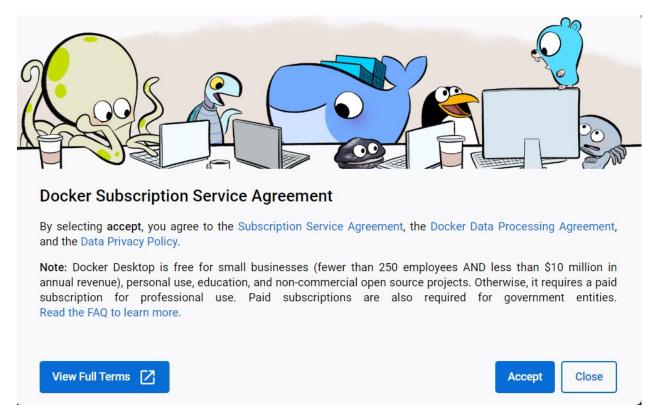

If you have not installed, please visit to https://www.python.org/ and comeback once it is installed.

2. Docker for desktop On Windows: https://docs.docker.com/desktop/install/windows-install/ On Mac: https://docs.docker.com/desktop/install/mac-install/ On Linux: https://docs.docker.com/desktop/install/linux-install/ On Ubuntu: https://docs.docker.com/desktop/install/ubuntu/

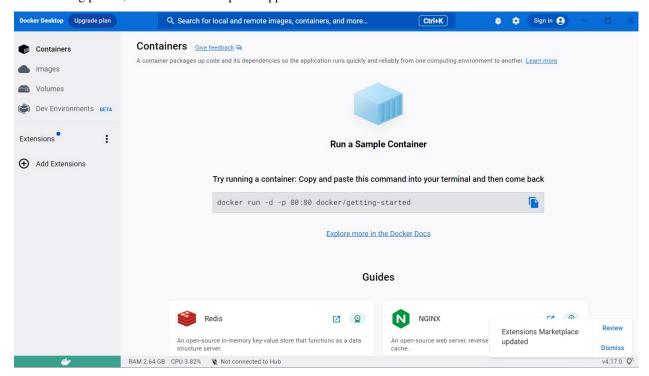

1.2 Making sure Docker Desktop is running:

After Docker Desktop is installed, open it.

Accept terms and condition when asked.

After starting period, the Docker Desktop will appear as followed:

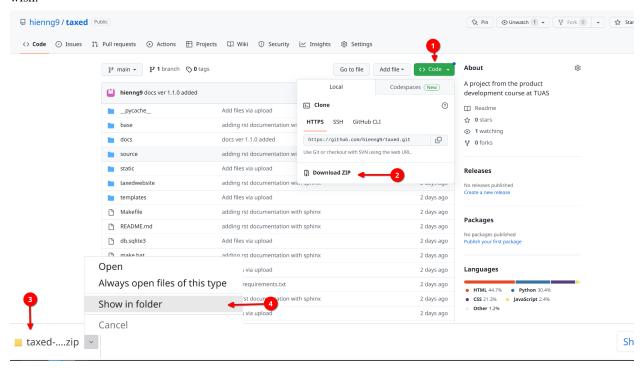

1.3 Cloning the repository

1. Clone the repository using the command below:

```
$ git clone https://github.com/hienng9/taxed.git
```

Or download the project directly from https://github.com/hienng9/taxed and extract the zip file to any location that you wish.

2. In case you use git to clone the project, continue by moving into the directory where we have the project files:

\$ cd taxed

Otherwise, extract the download file, open your terminal to change to the directory where the project is extracted and go to the folder name taxed. From this point on, we will be using the terminal.

1.4 Creating a virtual environment

Let's install virtualenv first if you have not already:

\$ pip install virtualenv

Then we create our virtual environment:

\$ virtualenv envname

Activate the virtual environment using either on Windows:

\$ envname/Scripts/activate

or on Linux or Mac:

\$ source envname/bin/activate

Finally, run the following command on Windows::

\$ docker-compose up

On Mac or Linux use::

\$ sudo docker-compose up

Waiting for all the neccessary dependencies are installed and images are created. You should have the following:

```

```

After that, open a web browser and go to http://127.0.0.1:8000/

Press Control-C to end the below command.

HOW TO NAVIGATE THROUGH THE WEBSITE

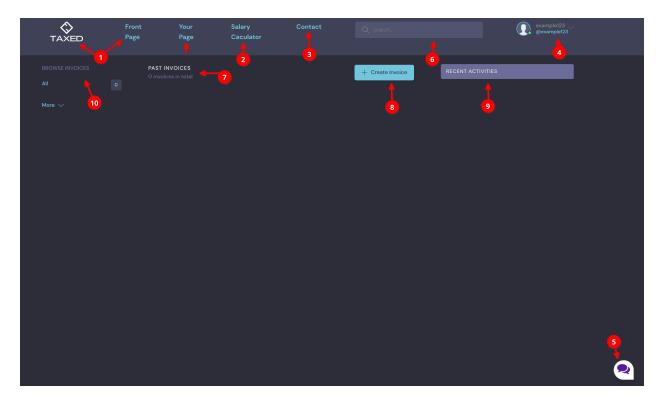

In this section, you will know more about navigating in the website.

If you are not logged in, then all you see is the front page tab, salary calculator tab, contact tab and login logo.

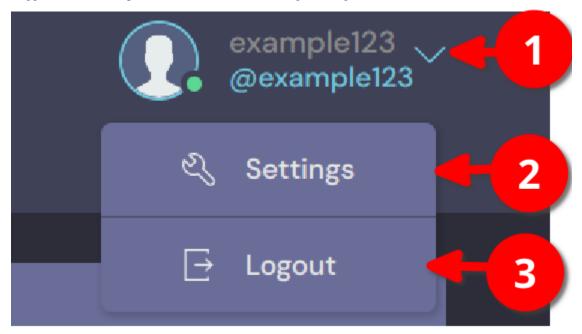

- 1. Click on "front page" or the logo image will lead you to the first page of the website where you can find a lot information about the company, products and services. It is right now still under construction.
- 2. "Salary calculator" will lead you to the income calculator where you can know how much you earn after taxes and other funds as well as insurance.
- 3. Click on Contact tab if you have any questions or you want to contact us.
- 4. Click on Login to login into account or register new user.
- 5. Click on the image of messages to start having a conversation with website's chatbot Tuuli.
- 6. Search bar where you can search for information on the website.

For logged-in users, there are information and tabs.

Information in number 1, 2, 3, 5 and 6 are the same as anonymous users. Logged in users have their own page where they can browse their invoices (#10), create invoice (#8), see past invoices (#9) and check recent activities on the website.

Logged in users can update their information in settings and log out.

HOW TO USE SALARY CALCULATOR

In this section, you will find information on using the salary calculator.

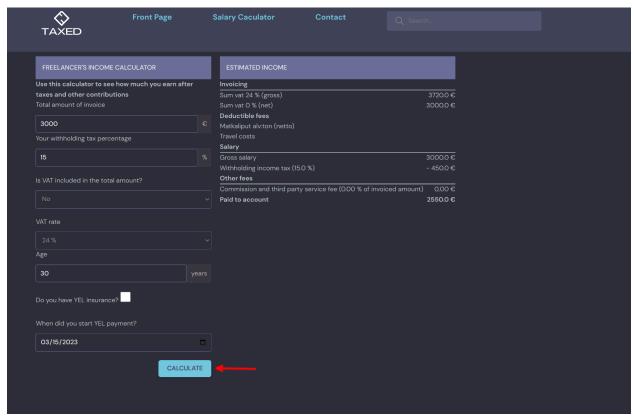

Head to the nagivation bar and choose the tab salary calculator.

Fill in the form the following information.

- 1. Total amount of invoice. For example, 3000 euros. In case you are paid hourly and want to charge customers 30 hours for 20 euros per hour, then the total amount of invoice will be 3000 euros.
- 2. Your widthholding tax percentage. This can be found in your tax card.
- 3. Is VAT included in the total amount of invoice?
- 4. if Vat is included int the amount invoicing, please choose the vat rates, either 24%, 10% or 0%.
- 5. Age of user. This will be used when user is YEL-reliable.
- 6. Are you YEL-reliable? An entrepreneur are obliged to take out YEL insurance when their yearly income exceeds a certain amount.
- 7. The date when you start taking out YEL insurance. This is used to calculate the percentage of YEL insurance fee that you have to pay.

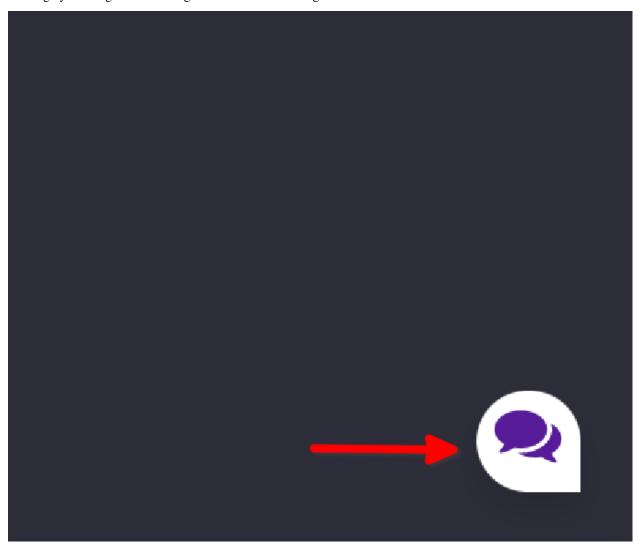

Click Calculate to show the estimated income after taxes and other fees.

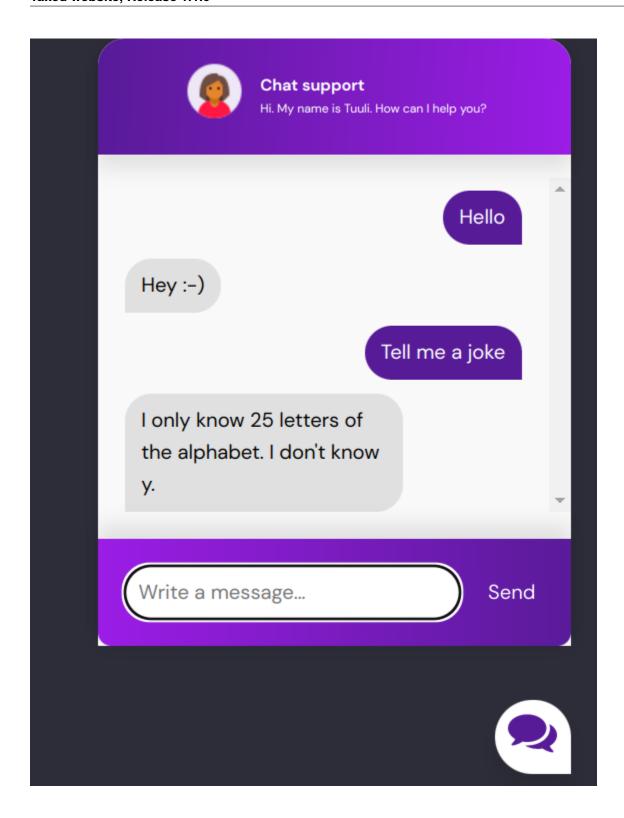

HOW TO INTERACT WITH CHAT BOT

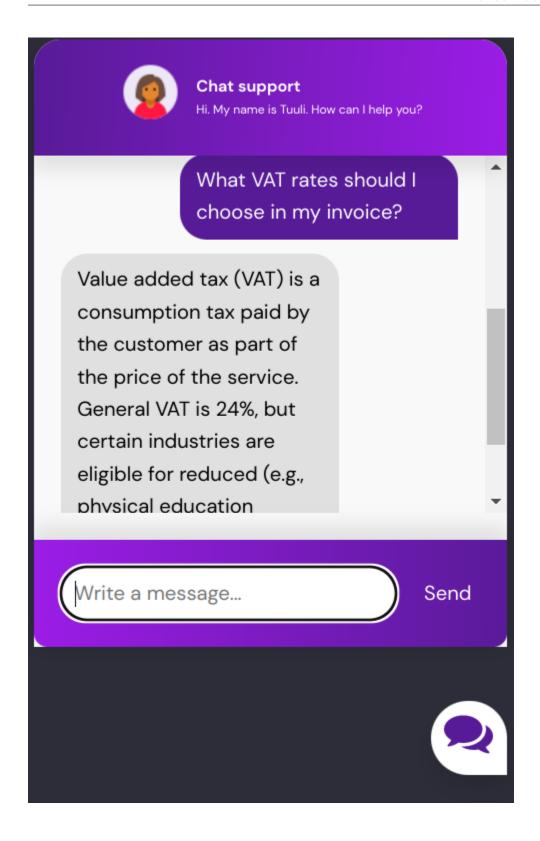

In this section, you will be shown how to make the best out of chat support.

Starting by clicking on the messages icon at the bottom right corner.

The chat support box will appear. User can start interact with chat support by sending different messages. Examples are shown below.

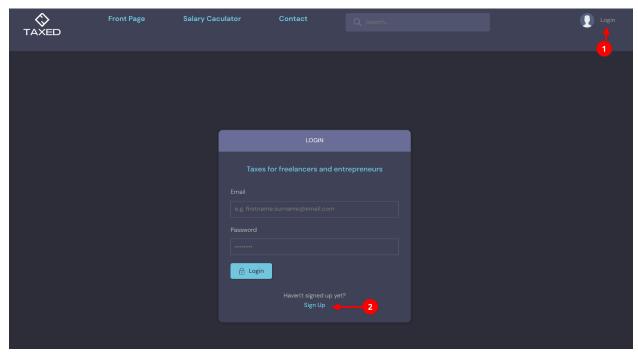

12

USER REGISTRATION, LOGIN AND LOGOUT

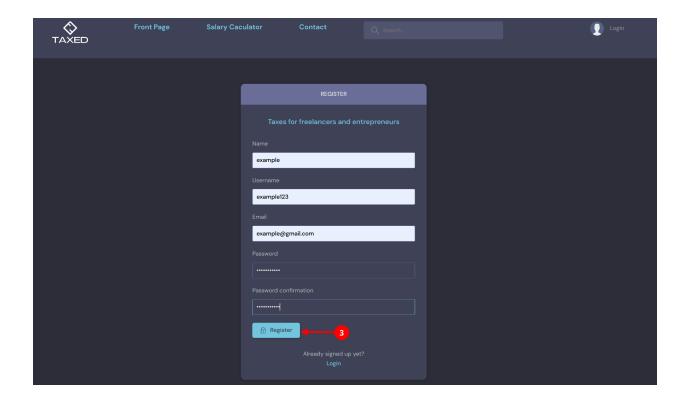

In this section, you will find information on how to create a user acount.

5.1 Not yet a user?

If you have not had an account yet, register by click on the Login on the top right corner. When a login box appears, click on sign up to start fill in information.

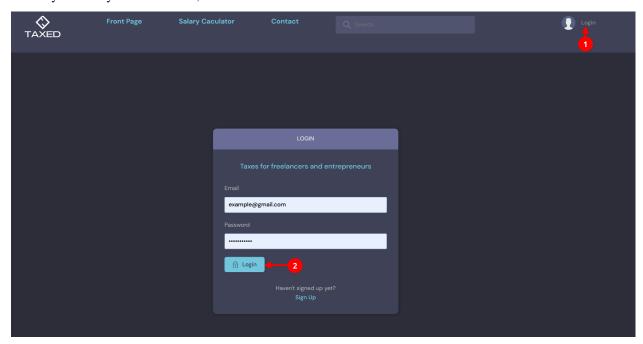

In the registration form, fill in all the necessary information such as name, username, email and password. After that, click on "register" button.

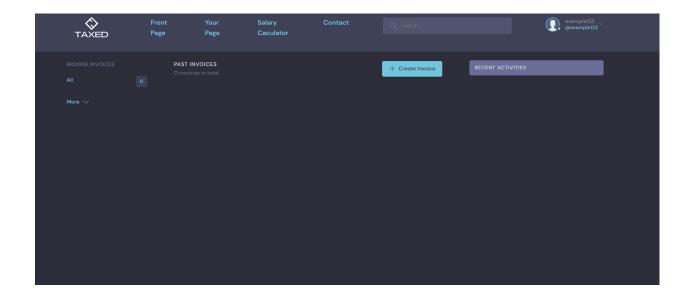

5.2 Already a user?

In case you already had an account,

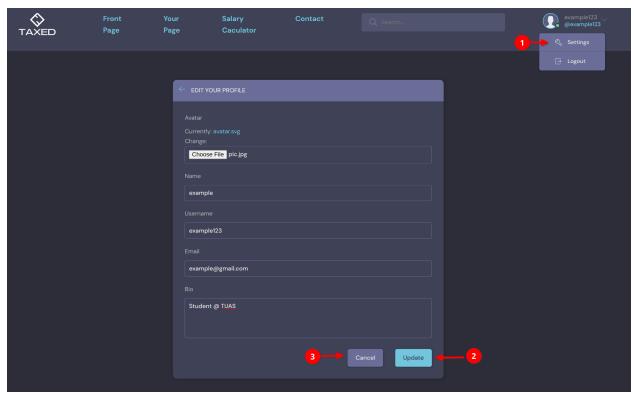

Either you register new user or login, at the final step, your landing page will be as belows:

HOW TO UPDATE USER INFORMATION

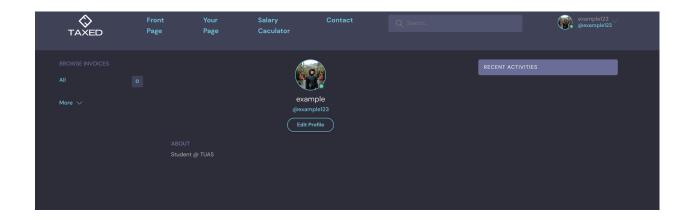

In this section, you will be guided on how to change profile picture and update bio information. First, click on the setting in our avartar logo.

Second, choose a profile picture from computer, update your name and fill in the bio section. Please note that the bio section is not allowed to be empty at this stage.

At final step, click on update to update information or cancel to go back to previous page.

If you click on update, you will land on the profile page as follows.
